

Content

1. Basic Electricity	5
1.1. Effects of electricity in the human body and safety procedures	5
1.2. Electrical resistance	7
1.3. Resistance measurement	8
1.4. Direct current sources	9
1.5. Voltage measurement	10
1.6. Voltage, current and Ohm's law	11
1.7. Current measurement	14
1.8. Power and Watt's law	14
2. Alternate Current (Ac)	17
2.1. RMS Value and Frequency	17
2.2. Measure AC voltage and current	19
2.3. Power and energy	20
3. Power Generation and Distribution	22
3.1. Generators	22
3.2. Transformer	23
3.3. Utility power distribution	24
4. Domestic Electrical Installation	28
4.1. Relevant standards	28
4.2. Transformer types for domestic distribution	29
4.3. Earth connection	31
4.4. Single and dual phase control panel	33
4.5. Load distribution	36
4.6. Wire capacity	38
4.7. Conduits	40
4.8. Electrical hardware	41
4.9. Switch and outlet types	42
4.10. Lighting installation, switches and sockets	42
5. Domestic Electrical Drawings	41
5.1. Electrical drawings	41
