

European lift industry gets ready for LIFTEX 2019

Now in its 31st year, LIFTEX 2019 will once again be the meeting place for the European lift industry. Organised by the Lift and Escalator Industry Association (LEIA), the event takes place only once every three years. This year, it runs from 15-16 May 2019 at London's ExCeL.

Building on the success of what was consider an outstanding 2016 event, 2019 is shaping up to be even better. LIFTEX Show Director Oliver Greening explains, "*LIFTEX 2019 really has been three years in the making. We have more European and international exhibitors than ever before and have created a dynamic business environment for the industry. With uncertainty and changes in standards ahead — plus ongoing challenges with modernisation — our free seminar programme will equip you with the tools and knowledge you need.*"

What's in store at LIFTEX 2019?

Free Seminar Programme

Running alongside the exhibition is the free seminar programme, offering the latest guidance and advice on hot industry topics. Sessions include:

The future development of British, European and International standards in our industry

With work on several British standards, a raft of updates and revisions scheduled for several standards in the EN 81 family, and progress toward a global International standard, this session will signpost the key changes and their implications for the lift industry in Europe and beyond.

Speaker: **Ian Jones**, Codes Director - EMEA, OTIS, Chairman, MHE/4, BSI Committee for Lifts, Hoists and Escalators and Chairman, LEIA Quality & Technical Committee

Lifts for Evacuation Use: Key considerations for building design and modernisation planning

Evacuation of people with disability or impaired mobility should now be at the forefront of building design and modernisation planning. In this session, the use of lifts for evacuation and the relevant guidance will be explored.

Speaker: **Matt Ryan**, Associate Director, The Fire Surgery Limited

Analogue to fibre: Understanding the options for lift emergency-communication phones

Regulations require that emergency-communication devices be available for passengers to call for help in the event they become trapped in a lift. Traditionally, this requirement has been met with the use of fixed landlines as the means of transmission for lift emergency calls. However, BT have already begun to transition to a fibre-digital network with the target of an all-digital network by 2025. In this session, the significant implications of this change will be discussed and the options available will be outlined.

Speaker: **Matt Davies**, Market Insight and Innovation Manager - Americas & EIMEA Avire, and Member, European Lift Association Tele-Alarms Working Group

Revision of BS EN 81-80: Improving the safety of existing lifts

The new BS EN 81-80:2019 reflects the changes in BS EN 81-20 and experience gained with the original 2003 standard. This session outlines the key changes and the principles of how to apply this crucial standard.

Speaker: **Dave Searle**, National Technical Manager, KONE, Member, LEIA Quality & Technical Committee Member MHE/4, BSI Committee for Lifts, Hoists and Escalators and BSI delegate at CEN TC10 WG1 and WG10.

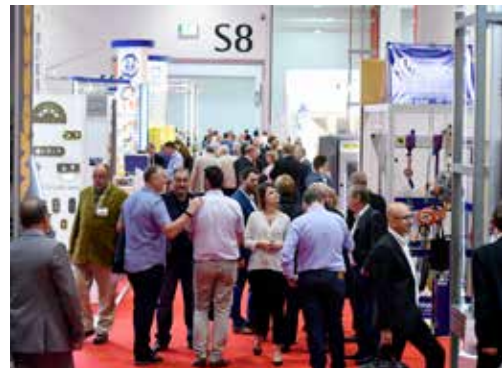

On the show floor

LIFTEX is designed to provide a showcase of the latest products and services from across the industry. Over 100 exhibitors from UK and Europe will be in attendance over the two days.

Highlights include:

- ◆ A & A (stand C34) will be promoting the business changes following its acquisition by Dewhurst PLC in June 2018. The team will be on hand to demonstrate cost-effective products from the world's leading manufacturers.
- ◆ Family-run Bullet Lift Services (G36) will be promoting its maintenance and repairs services along with its training division.
- ◆ Celebrating its 10-year anniversary, Digital Advanced Control (B30) will be demonstrating lift controllers including traction, hydraulic in hard-wired and plug-and-play format, lift positioning systems, lift indicators TFT & dot matrix, lift ancillary equipment, including CTCs, halfway boxes, COPs & LOPs, load monitoring and lift remote monitoring.
- ◆ Drucegrove (F54) will be demonstrating its DragonFly™ & FireFly™ range of TFT screens, the associated DragonFly Designer Software and DragonFly Remote Configuration Software and family of 2Wire products (including Digitalker® Speech Unit, BigVoice™ Intercom and Equator® Rope Tension Gauge).
- ◆ Gartec Lifts (D56) will be exhibiting the 7000 platform lift, ideal for passengers, light goods (up to 500kg) and internal or external placement.
- ◆ Celebrating its 20th anniversary, GLE (Spain) (C10) provides lift packages ranging from small home lifts to high-capacity car and lorry lifts. It specialises in lift packages for the UK market, and can design lifts for all installations.

Continued

- ◆ Global Lift Equipment (C30) is inviting visitors to see the very latest technology available across the range of its flagship products from the industry leaders including FERMATOR doors, MONTANARI geared machines, SICOR gearless machines and more.
- ◆ On stand E24, Hydratec Lifts will be demonstrating its range of hydraulic services, energy-efficient hydraulic valve kits and options, Hydratec Smart: Smart, EcoSmart and EcoSmart+ with new options, plus its full modernisation service.
- ◆ International Lift Equipment Ltd (D24) will display a combination of traditional industry standard products and unveil its new ideas and designs, showcasing the new ILE MRL. The Trent was released last year and is selling strongly in both the public and private sector. The ILE Trent MRL comes with GAL or Prisma doors, and is built to last.
- ◆ Specialising in the manufacture of bespoke metal shafts, Industria (G40) will be showcasing its range of structures, with a special focus on high-end projects.
- ◆ Celebrating its 40th birthday, Jackson Lift Group (C14) has been involved with LIFTEX since its inception. It will be promoting its maintenance, repair, upgrade and modernisation services, together with its supply and installation service of bespoke new lifts and escalators.
- ◆ Lester Controls (E20) will be welcoming both existing and new customers to join them as friends and experience some of its renowned hospitality. Apart from its current range of controllers, it will also be focusing on OEM replacement control solutions and a range of ancillary items that include a new TFT display, push buttons and Click and Connect lift shaft wiring.
- ◆ The team from NDC will be on stand F36 to discuss elevator drive repair and refurbishment needs. It covers all OEM makes and models and offers a unique Service Exchange stock for many drives offering off-the-shelf availability. It will also be demonstrating some of its latest test-rig equipment.
- ◆ Attending LIFTEX for the first time is lift manufacturer Metron (D64), based in Greece. The team will be on hand to discuss its complete range of fully customised lift solutions, currently sold in 45 countries worldwide.
- ◆ PRNS Building Services will be showcasing the company's full building service offerings alongside examples of its work on stand G54.
- ◆ Sassi Lift Systems (E30) will be promoting its partnership with OCTE (France) to supply a mechanical lift package specifically designed for the UK market, with the option of including a UK-manufactured control system. It will also be exhibiting its market-leading range of geared and gearless machines.
- ◆ Terry Group (C20) will be showing its range of fixed and portable wheelchair lifts, and the team will be on hand to discuss through-floor homelifts and commercial lifts.
- ◆ Offering lift control and lift monitoring systems for almost 50 years, Thames Valley Controls (C50) will be demonstrating its Ethos 2, Navigator, CMS Anywhere and emFONE autodiallers – developed through user feedback and innovation.

“It’s shaping up to be another great event” concludes Greening. “In addition, we are thrilled that the European Lift Association (ELA) has chosen to hold its General Assembly and Annual Conference in London just before LIFTEX from 13-14 May. It will certainly be a productive and focused week for the lift industry. We would urge you to be a part of it.”

Registration is free at www.liftex2019.com. Follow the show on Twitter @LiftexShow or LinkedIn www.linkedin.com/showcase/liftex-2019

LIFTEX 2019...are you going to be there?

“This year’s LIFTEX is gearing up to be the best yet”, said Oliver Greening, LIFTEX event director. *“There is such a buzz around the show from the industry that we have been adding new stands to the floorplan to keep up with the demand. Visitor registration is looking good, and there is a lot of chatter about the show across social media.”* Taking place on May 15-16 at ExCeL in London, LIFTEX has more exhibitors than ever before, with 30 attending for the first time. International exhibitors are coming from 18 different countries, and there will be thousands of innovative products on show, some of which have never been seen before at a U.K. event.

There will also be more seminars than ever — eight free sessions this year. Starting at 11:30 each day and running concurrently, they include:

Dave Searle, LEIA Quality & Technical Committee member, addressing the new BS EN 81-80: 2019, which has significant changes from the original 2003 standard: the session will outline the key changes and refresh the guidance for specifiers on how they should apply this crucial standard to prioritising safety improvements as part of a lift modernisation.

John McSweeney, director, Terry Lifts, and LEIA Personal Lift Group Committee member, focusing on the important considerations when specifying vertical lifting equipment for the home: this includes essential factors to be aware of when advising clients.

Len Halsey, Canary Wharf Contractors, and CIBSE Lifts Group chairman, looking at goods lifts and the secret life of buildings, another first for the show: moving materials in and out of buildings is critical to their operation, but we need to keep this vital provision in mind. This session will highlight key considerations in planning and managing the use of lifts to move goods around buildings.

Matt Ryan, associate director at The Fire Surgery Ltd. on fire safety and its importance in building design: evacuation of people with disability or impaired mobility should now be at the forefront of building design and modernisation planning. The use of lifts for evacuation and the relevant guidance will be explored. The programme will end with a panel discussion and question-and-answer session.

Dave Cooper, managing director, LECS UK, will begin the next day of sessions by talking about escalators and the issues for duty holders, including maintenance, examination and guidance on modernisation: many of the thousands of accidents on escalators every year result in criminal or, more often, civil claims against the owner of

the escalator. There is, of course, an onus of duty of care on escalator owners to ensure their equipment is appropriately specified, properly maintained and adequately examined. However, owners often fall foul of this because of insufficient documentary evidence clearly demonstrating it has fulfilled its duty. This seminar will seek to address these issues and offer a clear understanding of what the responsibilities are.

Matthew Davies, market insight and innovation manager — Americas and EIMEA, Avire, and European Lift Association Tele-Alarms Working Group member, updating visitors on the switch from analogue to fibre for lift emergency communication phones: this follows Ofcom's recent review, which included a request for the promotion of fibre-to-the-premises investment and support. Davies will explore the options available to comply with these upcoming changes.

Nick Mellor, LEIA managing director, again joining the lineup to provide guidance in “a survival guide for lift managers and duty holders” by highlighting their legal obligations and sources of guidance and support in meeting their duties.

Ian Jones, chairman of BSI's MHE/4 Committee for Lifts, Hoists and Escalators and the LEIA Quality & Technical Committee, rounding off the programme, by focusing on the future development of British, European and international standards in the industry: with work on a number of British standards, a raft of updates and revisions scheduled for several standards in the EN 81 family and progress toward a global International standard, the session will signpost the key changes and their implications for the lift industry in Europe and beyond.

Exhibitors, A-Z

With record levels of exhibitors to meet and thousands of innovative products on show, here's a lowdown of who's who:

A & A ELECTRICAL DISTRIBUTORS LIMITED | Stand C34

<https://www.aa-electrical.com>

For over 35 years A&A Electrical has provided a one stop shop for lift and electrical products throughout the UK and overseas. We research, source and stock cost effective products from the world's leading manufacturers and provide them to our customers affordably, efficiently and right first time. At A&A we put our customer first.

AKE ELEVATORS, ESCALATORS AND DISABILITY PLATFORMS | Stand A14

ALGI | Stand E40

<http://www.algi-hydraulic.de>

ALIMAK | Stand D54

<http://alimak.co.uk>

Alimak is a global market leader and pioneer in the design and manufacture of rack and pinion vertical access solutions. The company provides high quality elevators, construction hoists and work platforms primarily for the industrial and construction sectors.

ARD LIFT COMPANY | Stand B12

ARMSTRONG | Stand G64

<https://www.liftceilings.com/>

Armstrong, the global leader in suspended ceilings brings its design expertise to the lift market. Our range of lift ceilings offers a wide variety of materials, colours and shapes that can create a lift interior that improves the feeling of well-being and act as a design statement, all whilst offering the function required of a modern building.

ATWELL INTERNATIONAL | Stand F64

<http://atwellinternational.com/>

We pride ourselves on our technical support and customer service and are proud to acknowledge a well-established customer base of multi-national and

independent lift companies who return to us time and time again. Our mission remains to provide the ultimate safety products and support to the lift industry.

BEIJING KEYUANLONG TECHNOLOGY CO. LTD | Stand G12

<http://www.keyuanlong.com.cn>

For over 25 years, Beijing Keyuanlong Technology Co., Ltd. (KYL) have been the leading supplier of comprehensive Elevator Communication System Solutions. We design, manufacture and sell a wide range of high quality products covering EN 81-28:2018 compliant elevator phone systems, access control, intelligent connected panel and elevator monitor system. We are also committed to providing highly customised solution to meet our customers' individual requirements.

BEW ELECTRICAL DISTRIBUTORS LTD | Stand B64

<https://www.bewdirect.co.uk/>

BEW Electrical Distributors offer high quality products from some of the leading brands within the lift industry to contractors throughout the UK. Our aim is to offer something different to our customers, to make every experience as unique as possible.

BIOFIAL HYDRAULICS (BIOFIAL S.A.) | Stand C42

<http://biofial.gr>

BIOFIAL is a well-organised hydraulic lift system Industry. It's the first and only company in the field of hydraulic products in Greece. Founded in 1973, it began its activity with the production of hydraulic cylinders and later extended into the production of quality hydraulic products for elevators. More than 80% of its production is exported in more than 50 countries universally. It is certified with ISO 9001 from 1998 & is awarded with the bronze award in the Greek Export Awards of 2015.

BLAIN HYDRAULICS GMBH | Stand E36

<https://www.blain.de>

Blain Hydraulics has specialised in flow control valves for well over four decades. We are the largest supplier of elevator valves with a large global footprint. At Blain, safety, reliability and quality of our products are of utmost importance. With product support in multiple languages and across different time zones, over 75 countries worldwide endorse us as a leading supplier of valves and key elevator components. Flow control is in our DNA, we don't just manufacture a valve, we engineer it.

BOREL LIFT | Stand E12

<http://www.borel-lift.com>

Borel lift is a professional lift manufacturer with an extensive range of non-standard, bespoke lift and tailor-made solutions. They offer exclusive designs and finishes, heavy duty solutions for goods and passenger transportation; all fully compliant with existing lift regulations and directives. Borel Lift means high quality, flexibility, fast service and delivery on time.

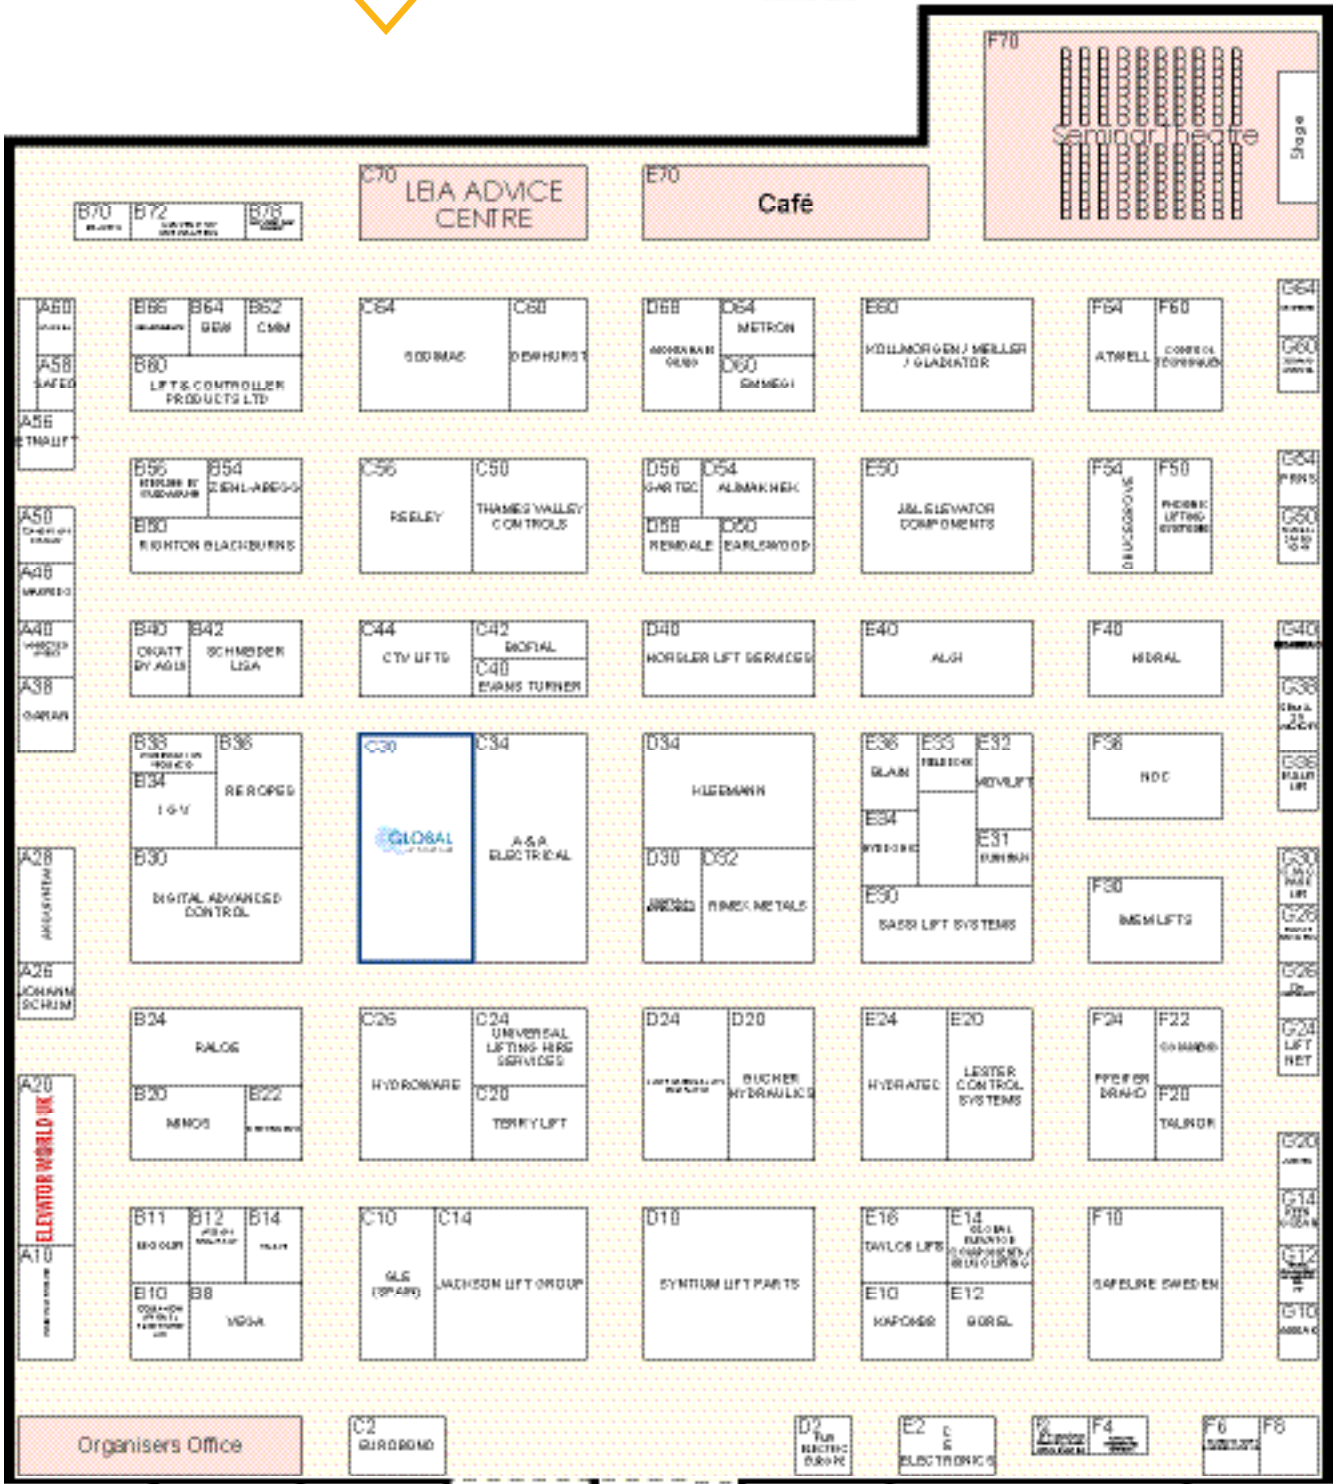

BRUGG LIFTING - GLOBAL ELEVATOR COMPONENTS LTD | Stand E14

<https://www.brugglifting.com>

As a supplier of high-performance elevator ropes throughout the world, Brugg Lifting provides for the safe passenger and goods transport – even in large lifting heights. Long service life, smooth running and high quality are the features of the Swiss company's products and the standards for the product development and optimisation. As a result, customers are provided on time with tested complete solutions, components personally assembled and customised solutions.

BSI MHE/4 COMMITTEE FOR LIFTS & ESCALATORS | Stand B70

Continued

Entrance

BUCHER HYDRAULIC AG | Stand D20

BULLET LIFTS | Stand G36

<http://www.bulletlifts.com/>

We are the Midlands' leading family run, independent lift engineering company, providing our customers with bespoke lift services specific to their requirements. We pride ourselves in delivering a professional, quality service centred around excellent customer service. We apply the same high levels of professionalism, attention to detail, personalised customer service and honesty to all our customers regardless of their size.

CE ELECTRONICS LTD | Stand E2

<http://www.ceelectronics.co.uk>

CE Electronics are world leaders, supplying indicators and fixtures for modernisation and new lift installations. We have full lines of position indicators - from the latest impressive touch screens, through our excellent Elite Advanced and Mini TFT ranges, to the regular 16 Segment and Dot Matrix displays - plus compliant DDA/ADA products, security and access systems. Also offer customised Vintage Sweep and Multilight Displays and bespoke products. Most controllers supported and we are the Indicator Specialist.

CMC SNC | Stand G30

<http://www.cmcparklift.com>

Our company has worked in parking and elevation car systems for more than 30 years. Our experience, along with our professionalism and projects care, make us one of the leading companies in the sector. Our industry experts can find and recommend the best solution for your parking problems.

CMM | Stand B62

<http://www.cmmelevators.com/>

CMM brand is a historic Italian specialist in the production of components & units, both hydraulic & traction. The current production structure was established in 1987. The most modern technologies and high-precision machinery allow us to design/produce a competitive range of products that includes new and interesting

models of Automatic Doors suitable for refurbishment of existing lifts, LIFT ME solutions with gearless motor and HOME LIFTS. CMM: Let yourself be lifted by people you trust.

COBIANCHI LIFTEILE AG | Stand B10

COMMEND UK | Stand F22

<http://www.commend.co.uk>

Commend is the world leader in integrated audio solutions. Our flexible cutting edge Virtual & IP technology provides enhanced security and safety to people around the globe. More than 250,000 Commend systems have already been installed worldwide. Our solutions are EN62820 (Advanced Building Intercom) compliant and can seamlessly integrate to the existing security infrastructure. All our systems are flexible and expandable to adapt to today's rapidly evolving environment.

CONTROL TECHNIQUES | Stand F60

CTV LIFTS | Stand C44

DENIS RAWLINS LTD | Stand F2

<https://www.rawlins.co.uk/>

Denis Rawlins Ltd are a supplier of innovative cleaning solutions which provide a scientifically-proven, hygienic clean, and great return on investment. With 50 years' worth of experience in the cleaning industry, we are now redefining ROI from 'Return on Investment', to 'Return on Innovation' - investing smarter for a better clean. Come and see how we can save you money, as well as give you better, repeatable results.

DEWHURST UK | Stand C60

<https://www.dewhurst.co.uk>

Dewhurst UK supply pushbutton, indicators and signalisation products to the UK lift industry. Our core pushbutton product is the Compact 3 which is used in thousands of installations across the country. The extra-large 'Jumbo' pushbutton is used in airports, railway stations and hospitals worldwide. At our facility in Feltham we have all the plant and machinery required to build all your

signalisation needs, full height COPs as well as LIPs and LOPs. Founded in 1919, we celebrate 100 years.

DIGITAL ADVANCED CONTROL | Stand B30

<https://www.digital-advanced-control.co.uk>

Digital Advanced Control, (DAC) is a Leading UK Lift Controller Manufacturer. We offer a range of quality lift Control systems and ancillary equipment for all types of elevators. We have supplied our high-performance products to a wide range of clients including Universities, Government buildings, Office blocks, Residential buildings and Local Authorities. As part of our Quality commitment we offer an unrivalled and Industry leading 5-year guarantee on all our manufactured boards.

DMC ELEVATION LTD | Stand G26

DRUCEGROVE | Stand F54

<http://www.drucegrove.com>

Drucegrove have designed and manufactured products for the lift industry in the UK since 1983, from position indicators and multimedia displays, to speech announcers and intercoms. We strive to bring our products to market with a creative flair that is impossible to nurture in larger organisations.

EARLSWOOD | Stand D50

EASTWOOD PARK TRAINING | Stand B78

<http://www.eastwoodparktraining.co.uk/>

Eastwood Park Training is a leading provider of specialist accredited technical training for engineers and estates and FM teams. Its lift training includes maintenance and safety, managing contractors and the safe release of trapped passengers, as well as courses for the Competent and Authorised Person. Learners benefit from a blend of theory and practice in a 3-storey lift maintenance tower, enabling realistic fault-finding exercises. Training can also be delivered at your premises.

Continued

ELECTROTECH | Stand B22

<http://www.electrotechweb.com>

Centrally located specialists in the repair and exchange of Lift Drives, Door Controller PCBs, CPUs and related electronics. We understand the urgency and can often complete repairs within 24-48 hrs. To verify successful repair, we have bespoke test rigs for Kone, Control Techniques, Omron, Yaskawa, Fuji Frenic, Otis and new for LIFTEX 2019 two newly installed Schindler Variodyn rigs. Same day exchange is available on many lines. We repair door controllers and have stock of Elex Italia Aurex PCBs.

ELEVATED ENGINEERING SERVICES | Stand F4

<http://eeslimited.co.uk/>

Elevated Engineering Services Ltd started trading in October 2009 to provide a high quality, professional and personal service in all areas of Electric Motor, Gearbox and Pump repairs/supply in and around the Northern Counties of England. Our client base now includes all of the major Blue Chip Lift companies both locally and nationally.

ELEVATOR WORLD UK | Stand A20

<https://elevatorworlduk.com>

ELEVATOR WORLD UK (EWUK), formerly *Elevation*, is a quarterly publication published by Elevator World, Inc. that is solely focused on the U.K. lift industry. EWUK is available in print, as a web-based digital edition and through the Elevator World app on Apple and Google Play stores. Collectively, EWUK has a readership of 3,500 industry professionals within the U.K. and surrounding regions. A free monthly email newsletter and website are available to keep the local industry up-to-date and informed.

EMMEGI UK | Stand D60

<http://emmegi.co.uk>

EMMEGI have been manufacturing heat exchangers for the industrial & mobile market for 40 years. Emmegi have been in the UK for just over 10 years, continually expanding through sales & marketing &

technically supporting the excellent line of high quality, high durability & highly efficient range of air blast hydraulic oil coolers. Here we carry vast stocks of both inline & offline cooling units, along with being able to offer extremely competitive prices.

ERGOLIFT | Stand B11

ESM SOFTWARE LTD | Stand G26

ETNA FRANCE (ETNALIFT) | Stand A56

<https://www.etnalift.com/en/>

ETNALIFT is the international brand dedicated to the export of our Etna France home lifts: we are the first French lifting devices manufacturer. For more than 30 years, our French family brand, born in Normandy from the ingenuity of two brothers, Rémi and Vincent Bronze, designs, manufactures and installs, for communities and individuals, “vertical mobility” expert equipment (elevators, homelifts and lifts for people with reduced mobility).

EUROBOND ADHESIVES LIMITED | Stand C2

<https://eurobond-adhesives.co.uk/>

Suppliers for high performance structural adhesives and adhesive tapes. Our range of Penloc, 2-part fast curing structural adhesives will bond most materials in just 5 minutes eliminating the need for welding, mechanical fixings, rivets, screws, bolts etc. Bond decorative metals for door skinning or lift entrances. Use our range of Eurobond structural acrylic tapes for bonding many dissimilar materials and our flexible range of adhesives. Visit us on Stand C2 right by the entrance.

EVANS TURNER | Stand C40

<http://www.evans-turner.com/>

Evans Turner (Finishes) Ltd is one of the leading suppliers of high quality architectural finishes to the Lift & Escalator Industry in the UK and Internationally. With over 80 years of expertise in bespoke metal fabrication,

Evans Turner have a tradition of designing, fabricating and installing products that elevate quality and stand the test of time.

FIELDBOSS | Stand E33

<https://fieldboss.com/>

FIELDBOSS is an end-to-end elevator contractor management software built for the Microsoft Cloud and within Microsoft Dynamics 365 and Dynamics GP. FIELDBOSS empowers organisations to connect to their customers, field staff and elevators, automate business processes and cut down the paperwork and inefficient operations in the back office and the field. Capabilities include: managing repairs, service agreements, modernisations, construction, inspections, scheduling & dispatch, mobile, MCPs & more.

FUJI ELECTRIC EUROPE GMBH | Stand D2

https://www.fujielectric-europe.com/en/drives_automation

Fuji Electric is one of the global industrial electric manufacturers from Japan with a core competence in electric energy technology. Fuji Electric's Drives & Automation approaches the UK market with innovative and environmentally responsible products and solutions. We manufacture and deliver high performance low voltage inverters and specialised HMI products that offer automatically controlled motor operation and speed for a wide variety of AC drive applications, especially of the lift market.

GANSER LIFTSYSTEME | Stand A50

<https://www.ganserlifte.at/>

Innovate Lifts and Ganser Liftsysteme supply a comprehensive range of access lifts and platform lifts, all fully installed to the highest standards of safety and without compromising on performance.

GARAN ELEVATOR LOAD WEIGHING SYSTEMS | Stand A38

<http://www.garan.co.uk>

The EWS 102 Control Unit designed by Garan and manufactured in the UK, provides a simple yet powerful range of

Continued

elevator load weighing options. The EWS 102 works with a variety of sensors including rope, beam, cabin, pressure and proximity, helping to simplify selection. Installation, setup and calibration have been devised to be as straightforward as possible and in addition, we offer UK based support and we are quite happy to liaise with your onsite engineers directly.

GARTEC | Stand D56

<https://www.gartec.com/>
Proudly celebrating 25 years in the industry in 2019, Gartec are the UK's leading supplier and installer of platform lifts. We pride ourselves on high quality, flexible design and turnkey service to make access simple. Our key '7000' screw and nut drive lift is versatile, offering internal or external installation, and passenger or light goods use. Combining contemporary design and exceptional engineering, Gartec provide everything from site visits and drawings to installation and maintenance.

GIOVENZANA INTERNATIONAL B.V. | Stand D30

<http://www.giovenzana.com/>
Giovenzana is a reality with over 60 years of history. Today it's a point of reference for: handling system, automation, lift, Atex, maintenance and control of mobile users. Giovenzana is a company certified UNI EN ISO 9001: 2015 and UNI EN ISO 14001: 2015 as it is attentive to the logic of sustainable development for the protection of the environment within its production processes.

GLADIATOR LIFT SYSTEMS | Stand E60

GLE (SPAIN) | Stand C10

<https://gle-lifts.com/>
Global Lift Equipment is a Spanish company focused on the design, manufacture and supply of complete lift packages, bespoke lift packages, service lifts, car lifts, platform home lifts and spare parts for elevators. It is dedicated to providing products of the highest quality

whilst also providing unbeatable customer and after sales service.

GLOBAL LIFT EQUIPMENT LTD | Stand C30

<http://www.global-lift.com>
A warm welcome awaits from the Global Team. We are UK Industry Leaders in providing solutions for modernisation. We will be taking centre stage, showcasing our latest innovation and expertise through our latest range: FERMATOR Door Systems -Robusta, Sovereign, Scenic & Novus Mod Range | Sicor Gearless | Energy Recovery Green Gem | Home Lift Controllers from Carlos Silva| Montanari Geared Machines | New Exclusive DMG Fixtures and more!
We look forward to seeing you.

GLOBAL SPARES AT KONE | Stand G50

<https://parts.kone.com/>
In need of elevator, escalator or building door spare parts? The largest multi-brand selection of original spare parts available online 24/7 with automated shipping. KONE Global Spares offers you an easy way to purchase all of your spares from one source online. 200 000 spare parts in offering with 50, 000 ready for instant delivery. Our dedicated sales team is ready to help you with any needs from identification support to personalised solutions. Sign up for a free account at parts.kone.com

GRAVOGRAPH | Stand B66

<https://www.gravograph.co.uk/>
Gravograph has been the global reference in the mechanical engraving and laser industry for over 75 years. Our expertise as a leader allows us to develop engraving and mechanical and laser cutting machines, accessories, software, engraving materials and to offer training, advice and technical support. Thanks to systematic research into the best technology, Gravograph equipment is synonymous with manufacturing quality, ease and speed of use.

HIDRAL UK | Stand F40

<https://www.hidral.com>

Hidral is an exclusive lift and platform manufacturer for lift professionals. These are customers demanding the highest safety and quality. As a result of this policy, Hidral UK based in West London is establishing a firm positioning within the UK market, specialising in big lifts: car lifts, goods lifts with attendants, service lifts, standard lifts up to a range of 10 ton and special lifts up to 50 tons. After sales support and technical sales are all available in the UK.

HORSLER LIFT SERVICES | Stand D40

<https://www.horslerliftservices.co.uk/>
Horsler Lift Services provides a complete range of engineering and support services to the lift industry. Drawing on over a decade of practical experience in the industry, we understand the needs of lift businesses and their customers. We undertake installation, maintenance, repair, refurbishment and upgrades. We can also provide expert advice on specification and hydraulic lift technology as well as inspections and reports.

HYDRATEC LIFT SERVICES | Stand E24

<https://www.hydratec-lifts.co.uk/>
For the past 25 years, Hydratec has been providing reliable specialist repair and modernisation subcontractor services to the UK lift industry. We now have over 200 Hydratec Smart hydraulic modernisation solutions in service along with various manufacturers control and valve options to meet customer requirements. As a result of ongoing customer requests, Hydratec are now, in addition to our repair and spares business, providing full supply and fit modernisation solutions for hydraulic lifts.

HYDRONIC LIFT S. P.A | Stand E34

<https://www.hydroniclift.it>
Hydronic Lift S.p.A is an Italian company that designs, produces and tests hydraulic components and safety components for both hydraulic lifts and traction lifts. For more than 20 years Hydronic has been serving customers worldwide, from small / medium local realities to the major, multinational companies. Hydronic Lift

Continued

has been examined by several certification bodies resulting in a large number of international certificates.

HYDROWARE | Stand C26

<https://www.hydraware.co.uk>

Hydraware Group celebrated its 20th anniversary in 2018, supplying a unique integrated drive and control solution for hydraulic lifts for both new and modernisation with the centre piece of the product on their patented servo-valve. It continues to invest 15% of the workforce in research and development with new generation products to be launched in 2019/20. The HydroElite product provides unrivalled direct to floor approach hydraulic lift solutions guaranteed function perfectly and easy to use.

IGV GROUP SPA | Stand B34

<http://www.igvlift.com>

Founded by engineer Giuseppe Volpe in 1966, IGV Group is a leading company in the design and manufacturing of DomusLift lifting platforms and lifts with reduced pit and headroom. For more than 50 years, IGV has been designing and manufacturing thousands of solutions for the vertical mobility, becoming a worldwide leader in the manufacturing of customised products.

IMEM LIFTS | Stand F30

<https://imem.com/en/>

IMEM Lifts is one of Europe's leading lift manufacturers with a well-established reputation for quality and reliability. We occupy a particularly competitive position in the lift market as we are one of the few fully independent lift companies on the entire continent able to offer an almost limitless range of lifts and components including lifts with or without a machine room in an enormous range of sizes and configurations, hydraulic lifts, goods- lifts, home lifts, bespoke lifts, and much more.

INDASTRIA SRL | Stand G40

<http://www.indastriasrl.it/en/>

Industria specialises in the design and production of bespoke metal structures for

lifts. We have a young team of designers that are able to draw a structure tailor-made for our customer needs that combines functional and aesthetics. Our average lead time for standard shafts? 4 weeks. Come and meet us!

INTERNATIONAL LIFT EQUIPMENT LTD | Stand D24

<http://www.ileweb.com>

ILE are a leading manufacturer and supplier of complete lift packages, lift components and peripheral devices to the UK lift industry.
