(57) **ABSTRACT**

PCT Pub. Date: **Oct. 13, 2016**

An elevator safety gear assembly includes a base plate having a guiding component. Also included is a first engagement member operatively coupled to the base plate and configured to be positioned on a first side of a guide rail. Further included is a second engagement member operatively coupled to the base plate and configured to be positioned on a second side of a guide rail. Yet further included is a connector operatively coupled to the first engagement member and the second engagement member for symmetric movement of the first engagement member and the second engagement member relative to the guide rail, the connector having a guiding element disposed in engagement with the guiding component of the base plate.
